-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of Group I, Species C, claims 31-33 in the reply filed on 6/5/2008 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-30 and 34-37 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group I, Species A, B, and D, and Group II, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 6/5/2008.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 31 and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Lam (US Pat. No. 5,607,444). Lam discloses the following of the claimed invention: an apparatus comprising: a catheter (23) having proximal and distal ends and a lumen extending therethrough; a balloon (37) affixed to the catheter, the balloon being in fluid communication with the lumen and having contracted and deployed states, wherein the balloon comprises a predetermined curved shape in the deployed state; and a stent (20) having contracted and deployed states, wherein the stent is plastically deformable by the balloon and substantially conforms to the

predetermined shape of the balloon in the deployed state, wherein the stent is configured to apply a compressive load on the mitral valve annulus in the deployed state. Please see Figures 1 and 6, and col. 6, lines 29-65.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 33 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lam in view of Zadno-Azizi (US Pub. No. 2002/0052638). Lam discloses the invention substantially as claimed, however, Lam does not disclose using an anchor within the balloon. Zadno-Azizi teaches a balloon catheter system that uses an anchor within the balloon in paragraphs 0200-0205 for the purpose of keeping the balloon inflated. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use an anchor within the balloon in order to keep the balloon inflated.
